2020 Modules and Contributors

Modules

- CT Image Quality and Protocols
- Estimating Cancer Risk from Imaging Procedures
- Image Quality and Dose in Radiography
- MRI: Gadolinium-based Contrast Agents
- MRI: Instrumentation
- MRI: Special Acquisition Methods
- Radiation Dose and Safety in Interventional Radiology
- Radiographic Image Receptors
- Radioisotopes and Radiopharmaceuticals for Nuclear Medicine
- SPECT/SPECT-CT/Image Quality

2019 Modules and Contributors

Modules

Gamma Cameras / Image Quality
Image Display
Imaging Gently: Medical Imaging and Radiation Protection of Pediatric Patients
MRI: Image Characteristics
MRI: Pulse Sequences
Radiation Detection Instrumentation in Nuclear Medicine Practice
Radiation Dose in CT
Ultrasound Image Acquisition and Doppler Ultrasound
X-Ray Tubes and Spectra

2018 Modules and Contributors

Modules

Basic Concepts in Radiography
Basic Principles of Nuclear Magnetic Resonance
Interactions of Radiation and Tissue
MRI: Image Artifacts
MRI: Image Formation
PET/PET-CT/Image Quality
Radiation Dose and Risk
Ultrasound – Concepts and Transducers

2017 Modules and Contributors

Modules

Atoms, Radiation, and Radioactivity
CT Systems
Digital X-Ray Imaging
Fundamentals of Radiation Protection
Image Processing and Reconstruction
Mammography Image Quality and Dose
Radiation Effects
Radiation Measurements and Units
Radiographic and Mammographic Systems for Radiology Residents

2016 Modules and Contributors

Modules

Basic Radiation Biology
Basic Ultrasound Imaging and Display
Fluoroscopy Systems
Image Perception and Performance Evaluation
Image Quality, Artifacts, and Safety in Ultrasound
MRI: Quality/Bioeffects/Safety
MRI: Siting and Environmental Protection
PACS
Radionuclide Dosimetry and Nuclear Regulations
